made to abide by their decision.

Make Capital a Dead City.

The leaders, however, were determined not to permit the strike to die without a final great demonstration of their power to render St. Petersburg a "dead city." After the adoption of the resolution calling for a referendim, it was decided to bend every effort to close every store, market and office, beginning at 11 o'cicek this morning and to stop all street carriage traffic in the streets so as to bring the life of the Russian capital to a complete standstill. The stoppage of the electric plants, which the government had succeeded in getting in partial operation was entrusted to electrical workers in the various districts, who were empowered to use any and all means deemed advisable for the injuring of the machinery and the short circuiting of the dynamos, even to the extent of destroying the plants.

Another resolution adopted, called for demonstrations to affect the release of the four deegates who had been arrested. It was decided to mass 3,000 men in front of each prison where the delegates are detained and to hold them until they are liberated. The prefect of police has published an appeal to the well disposed classes warning them that the strike leaders intend to take aggressive action to-day and asking them to co-operate with the police against the agitators, "who are making life unbearable."

The strikers laid stress on encouraging news from the interior, which they said they would be able to plare before the workmen to-day, but last hight's dispatches showed little confirmatory evidence of such news.

Eddy Advises Against Sending It (By Associated Press.)

ST. PETERSBUTGO, November 17.—The ring-leader of the Cronstadt mutiny has been sent to the Schlusselberg fortress, where he will stand trial. At the navy department it was stated that there is no intention to try the great mass of the inutinous sailors, the outbreak being regarded more as a drunken riot than as a mutiny, and for which the officers themselves were largely responsible. Only the leaders will be tried and their punishment will be as light as possible. The builk of them will be sent to sea on a punitive cruise.

Charge d'Affaires Eddy has received notification that the United States cruiser Minneapolis now at Cherbourg, after leaving that port will proceed to Copenhagen and if the American embassy thinks it advisable she will continue her cruise to the Baltic Sea in order that she may be available to meet any emergency here. Mr. Eddy, however, is notifying the State Department that the Neva will be fee-bound in ten days and advising against sending the cruiser here.

## RIGHT OF WAY FOR GAS WORKS

Electric Plant Movement Not to Be Pushed for Present.

Until obviously necessary provision is pally owned and operated gas works, no further steps will be taken in connection with the recently agitated question of establishing in Richmond an electric lighting plant under city control. Reports current to the effect that since

the development of the real conditions existing at the gas works the other move ment had been indefinitely sidetracked, and would probably not soon recover mo tion again, were emphatically dealed yesterday. The delay in pushing the matter is said to be only temporary, and as soon as the gas situation is cleared up and the report of the committee on investigation has been received and acted upon, the electric plant matter will be taken up again and pushed to an issue. The danger of confusing the two and of connecting the gas revelations with the electric project is declared by Alderman Dabney, who is leading the fight, to be one of the chief reasons for holding further action at this time in abeyance. For some time past Mr. Dabney, assisted further action at this time in abeyance. For some time past Mr. Dabney, assisted by Engineer Trafford, has been engaged in preparing his reply to the Gould argument, as presented by Mr. Anderson, and the work is nearing completion. Under the circumstances, however, the reply will not be made for several weeks. "It was simply a question of which was the more urgent, the needs of the gas works or the electric plant matter," said Mr. Dabney yesterday, when questioned about the rumor that the new tioned about the rumor that the new municipal ownership proposition was about to die a natural death. "We think it is necessary first to re-establish the gas works on a sound basis, and hence will take no further steps until the committee on investigation makes its re-

sheets of his district. He said that he can be corrors would be found and that he would fight all protests. The first sheet examined showed that Hearst had not been credited with 33 votes which were cast for him. In the third election district the returns of election night showed no vote for Hearst and 33 for Crawford, the prohibition candidate, but the tally sheet showed that these votes were cast for Hearst, while the prohibition candidate received none.

Minor errors, apparently elerical or resulting from the blunders of the election officers, were found in a large number of port.
You may say most emphatically that I am not giving up the fight, and that I will be prepared when I think the proper time arrives to make a complete reply to Mr. Anderson's argument."

### Give Movement Setback.

It is unquestionably true that the gas works situation, coming to public note at this time, has served to give the elec-tric plant movement a setkack, insofar at at this time, has served to give the electric plant movement a setback, insofar at least as public sentiment is concerned. The argument is being used in the public prints and elsewhere. Alderman Dabney points out that his proposition specifically avoids at the very outset the pitfalls that have tripped the gas works. It calls for a depreciation fund and makes every necessary provision for keeping the plant in thorough-going condition. Failure to make a similar provision in the case of the gas works is said to be responsible for the troubles of that institution.

The report of the Committee on Investigation will be made in about two weeks, perhaps. What it wil be, co outs reality call for a rehabilitation of the plant on modern lines and under a new system of management. Members of the committee will not talk about it. Mr. W. W. Morton, chairman of the committee will not talk about it. Mr. W. W. Morton, chairman of the committee will not talk about it. Mr. W. W. Morton, chairman of the committee will not talk about it. Be Unanimous Report. sulting from the blunders of the election officers, were found in a large number of additional election districts. In one instance no return was made by the ballot clerk. The examination will be continued on Monday.

It was announced to-day by coursel for William R. Hearst that an application would be made to the Supreme Court either on Monday or Tuesday of next week for an order to have the ballot boxes opened and counted.

The grand jury to-day handed down six more indictments in the election fraud cases, which they have been investigating for the past week.

## Be Unanimous Report.

(By Associated Press.)

ALBANY, N. Y., Nov. 17.—William R. Hearst, candidate for mayor New York on the municipal ownership tieket, certified that his total camzaign expenses were \$85,843. This breaks the record for such expenses, which was formerly held by Governor Higgins, who spent during the last State campaign \$22,000.

Mr. Hearst says that he contributed all but \$11,44 of the \$80,206 which was spent by the finance committee of the Municipal Ownership League for the benefit of all candidates on the ticket, and expended \$3,125 personally for buttons and lithographs. Some of the larger items were: Law department, \$3,507; printing, \$8,609; music, \$7,888; carriage hire, \$2,810; rental of halls, decorations and illuminations, \$12,012; watchers for elections, \$19,589; investigation of registration, \$3,026. Be Unanimous Report.

"It will be a unanimous report," said Mr. Morton, briefly.

To this statement Mr. Morton had little to add, except to emphasize that the members of the committee seemed agreed, and would likely act with unanimity.

"Has the committee considered a proposition to sell the gas works?" he was asked.

"Ts the same thing true of the sugges-tion that the city might lease the plant?"

tion that the city might lease the plant?"
"I can't say that."
Mr. Morton, while unable to fix the date for the completion and presentation of the report, thought it likely that the document woud be ready in two weeks.
